

I urge you to reject NAB petition 04-160. Satellite Radio has been an outstanding addition to my office environment. The music choices that we now have without commercial interruption is something we have always desired. We don't have to listen to crazy dj's talking about nothing, making crude jokes, pulling lame pranks, making embarrassing remarks, cutting down innocent groups of people. I feel satellite radio has been the best advancement in music entertainment choice in my lifetime. Having the ability to get weather and traffic information is a part of that choice. It even appears to me to be more informative than what I hear on regular radio. Please don't allow regular radio to stop this freedom of choice that I am willing to PAY for. Thank you in advance to listening to my paying voice and not that of some corporate giant or political force.
